XP METAL
DETECTORS

DEUS[®]

Available with the 9" or 11" coil

In one click, change the frequency, the power, the recovery speed !

DEUS A TECHNOLOGICAL BREAKTHROUGH !

Deus marks a technological breakthrough and is a real innovation in metal detector design . Its patented architecture is based on three elements: A Coil, a Remote Control and a set of Audio Headphones, which are unique in that they communicate with each other via a digital radio link.

Through the incorporation of cutting-edge technologies, DEUS achieves power, speed and precision, all in a lightweight and compact design.

The search coil contains the essential components for processing the signals, which no longer need to be conveyed via a wire link. The signal is digitized and analysed directly at the source by an ultra-miniature digital circuit, this greatly improves the quality of signal acquisition.

This circuit, which is integrated in the detection head, processes the information and sends it to both the headphones and remote control in real time via a digital wireless radio link .

SWITCH OFF THE REMOTE CONTROL ...

DEUS CONTINUES TO WORK !

The headphones alone can control the detector, enabling you to go detecting with an even more portable configuration (just 800g inc. coil cover). In the absence of the remote control, the headphones enable you to adjust all of the main detection settings:

Discrimination - Sensitivity - 4 frequencies (4, 8, 12, 18kHz) - Ground Balance - From 2 to 5 tones - Pitch , Full Tones - 10 factory programs - 8 empty slots for you to save - Indicates the target's ID - Volume - Choice of coil - Battery condition displayed

even programs previously created with the remote control!

DEUS DEEPER, FASTER !

- 4 frequencies (4 kHz, 8 kHz, 12 kHz, 18 kHz) + shift plus/minus.
- Adjustable Power and Recovery (2 or 3 times faster/slower than the XP Gold Maxx Power).
- Audio Response, Iron level, Multi-tone, Notch, Discrimination...
- Many advanced functions (Expert Mode).
- Ground balance options: Tracking, Pumping, Manual, Beach.
- 4 non-motion modes with audio and meter discrimination.
- Extended discrimination range, with even greater precision for iron rejection.
- 10 pre-configured factory programs + 8 user programs that you can save.

DEUS LIGHTER, MORE COMPACT !

- Wireless remote digital link, 36 channels with automatic selection.
- Ultra light detector: 900 g Full - 800 g without wireless control box (hip- mountable).
- Remote Control pocket sized (hip mount case provided), graphic display backlight and intuitive screen.
- 9" Carbon fibre impregnated 2D coil, both light and waterproof.
- Wireless headphones, with its own operational controls and screen, housing weatherproof.
- USB standard protocol to recharge and download new software/ update (via XP website).
- Lithium battery.
- Battery life: Coil ± 16 hours, Remote and Headphones ± 27H
- Fast and intelligent charger, charge simultaneously the 3 elements.
- Warranty 5 years parts and labour.
- Optional: Mini emergency charger, Coil 34/28cm (13"x11") DD, clip jack adaptor, waterproof armband, aerial antenna, ...
